***Specification***

Application cooperation is requested in correcting any errors of which the applicant may become aware in the specification.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1-6** rejected under 35 U.S.C. 103(a) as being unpatentable over

**Wolberg US Pub No. 2001/0044765 A1.**

**Regarding claim 1, Wolberg** discloses in the present invention a method for financing at least a portion of post-secondary education undertaken at a future date by at least some members of a predetermined group [0022]. **Wolberg does not disclose** a death benefit held in a trust.

Wolberg further discloses that additional benefits may be purchased from the program provider. Additional plan payments may be paid to cover, for example, protection against the untimely death of the paying party and/or protection against the paying party being unable to continue plan payments (e.g. because of disability or loss of employment [0042].

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to utilize the teachings of Wolberg to incorporate the death benefit as part of the trust fund.

The motivation would be to provide a means such that in the event the paying party was incapacitated or deceased, funding for post secondary education would still be available.

**Regarding claim 2, Wolberg discloses** the first plan members to reach college age and begin attending college; the program provider will begin making disbursements as contracted [0024]. **Wolberg does not disclose** specifically that the beneficiary receives 12.5% of the proceeds in each of the four successive years while in college, and the remaining 50% at the age of 30.

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to utilize the teachings of Wolberg to specify in a contract, distribution of trust proceeds at 12.5% at the age of 18,19, 20 and 21 and the remainder at the age of 30.

The motivation would be to create the added incentive for the student to perform well during their high school years since their tuition costs at the post-secondary institution of their choice will already be partially paid for. In addition, the funds will be disbursed in increments such that there will be equal distribution during the first four years of higher education.

**Regarding claim 3, Wolberg discloses** the program provider will begin making disbursements as contracted [0024]. **Wolberg does not disclose** specifically

that the beneficiary receives at age 30 a ten-year immediate payment of an annuity with an A.M.Best rating of A or better.

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to utilize the teachings of Wolberg to specify in a contract, the individual requirements of the donor to the trust such that payments can be established to satisfy their wishes.

The motivation would have been to provide post secondary education funding plan in which the availability of funds are less limited and the likelihood of student loan repayment default is greatly reduced or eliminated. [0019]

**Regarding claim 4, Wolberg discloses** Insurance policy with death benefits [0017], historic costs and cost increases [0022], distributing the trust proceeds to the beneficiary [0040]; estimate the amount necessary to fund future education expenses [0038]. An object of the present invention is to make higher education more affordable by providing a method that guarantees the payment of the costs of tuition and/or other costs associated with post-secondary education at an educational institution of the plan member's choice. [0018]

**Wolberg does not disclose** the death benefit proceeds being paid into a trust fund.

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to utilize the teachings of Wolberg to incorporate the death benefit as part of the trust fund.

The motivation would have been to provide a means such that in the event the paying party was incapacitated or deceased, funding for post secondary education would still be available.

**Regarding claim 5, Wolberg discloses** the program provider will begin making disbursements as contracted [0024]. **Wolberg does not disclose** specifically that the beneficiary receives 12.5% of the proceeds in each of the four successive years while in college, and the remaining 50% at the age of 30.

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to utilize the teachings of Wolberg to specify in a contract, distribution of trust proceeds at 12.5% at the age of 18,19, 20 and 21 and the remainder at the age of 30.

The motivation would be to create the added incentive for the student to perform well during their high school years since their tuition costs at the post-secondary institution of their choice will already be partially paid for.

**Regarding claim 6, Wolberg discloses** the program provider will begin making disbursements as contracted [0024]. **Wolberg does not disclose** specifically that the beneficiary receives at age 30 a ten-year immediate payment of an annuity with an A.M.Best rating of A or better.

It would have been obvious to a person of ordinary skill in the art at the time of the invention was made to utilize the teachings of Wolberg to specify in a contract, the individual requirements of the donor to the trust such that payments can be established to satisfy their wishes.

The motivation would have been to provide post secondary education funding plan in which the availability of funds are less limited and the likelihood of student loan repayment default is greatly reduced or eliminated. [0019]
